01 INTRODUCTION

Altcoin markets move fast. Most traders see it late.

AltsDaddy is an analytics platform for altcoin traders. It watches seven centralised exchanges in real time and surfaces the coins that are moving: price pumps, volume surges and the tokens people are talking about.

The information traders need is scattered across exchange order books, social feeds and charting tools. By the time a move shows up on a timeline, the best of it is usually gone. AltsDaddy brings those signals into one screen and updates them every few seconds.

At the centre sits the **$DDY token**. Its main job is simple: to act as a membership token that unlocks AltsDaddy's premium tools, with staking and community voting alongside.

02 VISION & MISSION

Pro-grade signals, open to everyone.

Vision

Make professional-grade altcoin intelligence available to every trader, not only desks with data teams, by combining live market data, AI and a token-powered membership.

Mission

Give traders a real-time toolkit for spotting, researching and acting on altcoin moves, sustained by an ecosystem where the people using the tools hold the token that unlocks them.

03 THE PLATFORM TODAY

Already live, already in use.

$DDY is launching on top of a working product. These tools are live at altsdaddy.com today.

BIN Binance · BYB Bybit · KCS KuCoin · MEX MEXC · GTE Gate.io · CRO Crypto.com · BGX BingX

Live tracker LIVE

The biggest price and volume moves on each exchange, from 15 minutes to 12 hours, plus a combined view across all seven exchanges.

Pump history LIVE

Every detected pump logged by exchange, with its size, timing and price chart, so traders can study what moved and when.

Narrative heatmaps LIVE

See which sectors money is rotating into, such as AI, RWA, memes and DePIN, at a glance.

MCP for AI LIVE

Members can connect Claude, ChatGPT or Cursor to AltsDaddy's live data and ask questions such as "what pumped most on MEXC in the last hour?"

Diamond membership LIVE

The premium tier: 15-second updates instead of 60, every timeframe, a 21-coin watchlist, full pump history and MCP access. Today it is paid for by card. At launch, $DDY becomes the way to unlock it.

4×

faster updates than the free tier

04 WHERE AI COMES IN

From raw data to a clear signal.

AI is the layer that turns thousands of price ticks and posts into a short list of what matters. Some of it ships today; the rest is what $DDY funds next.

Altcoin monitoring LIVE

Continuous scanning of price and volume across seven exchanges, ranking the strongest moves every refresh.

AI assistants via MCP LIVE

A read-only connection that lets members' own AI assistants query AltsDaddy data in plain English.

Social & KOL tracking EXPANDING

Language models read X, Telegram, Reddit and Discord to measure sentiment, and map which influencers talk about which tokens, and how that lines up with price.

AI technical analysis PLANNED

Models that flag trend reversals, support and resistance zones and momentum shifts, shown next to each coin's chart.

Cross-market context PLANNED

How altcoins react to wider signals such as BTC dominance, ETH gas and equity indices, used to flag risk-on and risk-off conditions.

05 THE $DDY TOKEN

One token. One job: access.

$DDY is the lifeblood of the AltsDaddy ecosystem. Its core utility is to act as a membership token, granting holders access to premium platform features.

> **As more traders want the tools, more $DDY is needed to unlock them. Demand for the token follows demand for the product.**

Membership through $DDY

Tiered memberships

Stake or spend $DDY to unlock different levels of platform access.

Premium analytics

Full access to live tracking, every timeframe, pump history and AI tools.

KOL tracking suite

Follow the traders and analysts AltsDaddy's models rank as most influential.

Alerts

Custom alerts for price moves, trending tokens and unusual social activity.

More ways to use $DDY

Governance

Holders vote on platform upgrades, AI priorities and ecosystem incentives. Higher tiers carry more voting weight.

Staking

Stake $DDY to earn a share of fees and rewards.

Discounts

Lower prices on data APIs, enterprise integrations and AI reports when paying in $DDY.

06 TOKENOMICS & USE OF FUNDS

A modest float, a clear plan.

1,000,000,000
total supply

170,000,000
initial circulating (17.0%)

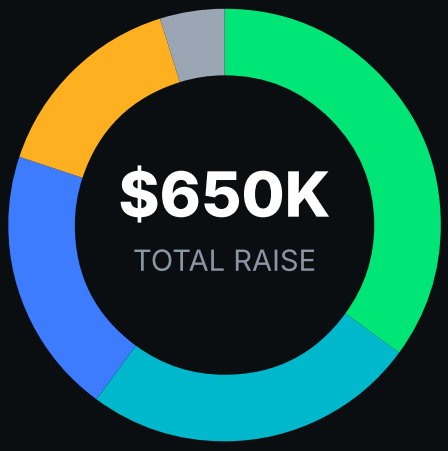
$0.002
listing price · $2M FDV

$340,000
initial market cap

Membership-driven demand and vesting of the remaining supply are designed to keep the token economy sustainable over the long term.

Use of funds

Proceeds from the token sale, **$650,000** in total, will be allocated as follows.



ALLOCATION	SHARE	AMOUNT
AI development Sentiment, TA and KOL models	35%	$227,500
Product development Infrastructure, membership, APIs	25%	$162,500
Liquidity & market depth	20%	$130,000
Marketing & community	15%	$97,500
Legal & compliance	5%	$32,500

07 ROADMAP

Where we're headed.

The platform is live and the token is launching soon. Follow **@AltsDaddycom** on X for the launch date.

1 **Launch** IN PROGRESS

$DDY token launch and membership tiers, on top of the live tracker, pump history, heatmaps and MCP for AI that are already running.

2 **Smarter signals** NEXT

Expanded AI models: automated technical analysis, deeper social sentiment and full influencer (KOL) tracking.

3 **Scale** LATER

Multi-chain coverage, enterprise API licensing and global membership growth.

4 **Community-run** LONG TERM

Governance handed to $DDY holders, community-directed AI model training and cross-chain analytics in one place.

08 RISKS

What could go wrong.

Adoption

Token demand depends on continued growth in users who want premium access.

Model accuracy

AI signals can be wrong. We improve models iteratively and are open about their limits.

Market volatility

Crypto prices, including $DDY, can fall sharply. Platform fees help balance this exposure.

Regulation

Rules for digital assets keep changing. We set aside resources to stay compliant as they do.

09 SUMMARY

Built for traders, powered by $DDY.

AltsDaddy pairs token-gated membership with live, AI-assisted altcoin analytics. Because the token unlocks the product, demand for insight and demand for $DDY grow together, backed by a platform that is already live across seven exchanges.
